We require that a statement of the patient's symptoms along with a copy of their most recent blood test & EKG be sent before they can schedule an appointment for a consultation if they are over 45. If the patient is less than 45 years of age we require a written statement of their symptoms and a blood test & EKG if they have had these tests performed in the past year. Otherwise if the patient hasn't had cardiac problems only the statement is necessary.

If patient is willing to pay out of pocket
