- Acute care: 12%

*Based on Center of Medicare & Medicaid (CMS) Inpatient Rehabilitation Facility Patient Assessment Instrument

What Patients Are Saying About Our Care

"All the doctors were knowledgeable of my day to day progress. I felt reassured each time the doctors visited me."

"The rehabilitation doctors were courteous, informed, professional, providing compassionate care."

"All the nursing staff were superb, extremely attentive to all my needs, anticipated problems and very professional."

"The nurses were amazingly patient with me even when I was a bit hard to handle. Every nurse made sure I was explained everything I was taking and when I got demanding about when I would go home, they again were patient to explain what was happening to me. There were so many great nurses. I also want to give a shout out to the Aides who were by my side since I kept trying to get out of my bed and chair. They were so patient and helpful when I couldn't help myself."

"My primary physical therapist was quite wonderful. She always challenged, but then also complimented me on my progress, AND SHE MADE IT FUN!"

"My PT therapists were great! They always gave me confidence & encouragement when I had my doubts about doing something."

"The physical therapists and occupational therapist were excellent. Because of them. I was able manage the skills and strategies I needed to safely return home. They were demanding but encouraging coaches and contributed to my positive state of mind."

"Occupational therapy was amazing. She helped me to not only do activities of daily living, she closely examined my home through photos and helped me plan the safest space for me considering my abilities. She went above and beyond to communicate with the family and help me and my family understand my limitations and my progress."

"From the very beginning, speech therapist made sure I was aware of what I was able to eat and not eat. They made my safety my priority even when I wasn't totally happy with the food I was eating. However, they also made sure that when I was able to eat, my menu was changed. They treated me to lunch and ordered my favorite meal to celebrate my progress."

"I am amazed you have a horticultural program. It felt good to plant a pot since I missed my garden & it made my soul feel good."

"I could not have had a more excellent experience. This hospital is a first rate, excellent rehabilitation facility and I would absolutely recommend it to anyone."

"My husband and I had great training before my discharge. We both felt able to go home and know we were able to manage my needs."
