

Sustainability & Healthcare Database

Health and environmental sustainability are fundamentally connected and are essential for the livelihood of our communities. NYU Langone and NYU researchers have recognized this connection and have led by example through their academic studies on this topic. This Sustainability & Healthcare Database compiles their publications on the intersection of public health, sustainability, pollution, and climate change.

This database serves as an educational resource that illustrates how hospitals can demonstrate leadership and allow research to drive meaningful changes in practice and care.

[Download the Sustainability & Healthcare Database here.](#)

This document shows the database organized by categories. To view this information in an Excel file which allow the user to sort and filter information, please use the download link above.

Categories:

1. Climate Change
2. Cost
3. Education
4. Exposure
 - a. Antibiotic
 - b. Chemical
 - c. Occupational
 - d. Prenatal
5. Food
 - a. Accessibility
 - b. Diet
6. Physical & Mental Health
7. Policy
8. Pollution
 - a. Air
 - b. Chemical
 - c. General
 - d. Noise
9. Population Health
10. Transportation
11. Urban Design
12. Waste

1. Climate Change

atmospheric drivers and healthcare's impact to climate change

Bayram, H., Bauer, A. K., Abdalati, W., Carlsten, C., Pinkerton, K. E., Thurston, G. D., Balmes, J. R., & Takaro, T. K. (2017). Environment, Global Climate Change, and Cardiopulmonary Health. *American journal of respiratory and critical care medicine*, 195(6), 718–724. <https://doi.org/10.1164/rccm.201604-0687PP>
